Thean Schutte

Director & Qualified Thermographer

# WHO ARE WE

We are a turnkey LED lighting solutions partner, delivering end-to-end solutions, from audit and design to installation and lifecycle support. Our offering includes thermography scanning by a **certified Category 1 Thermographer**, adding powerful diagnostics to validate installations, detect faults early, and safeguard your infrastructure.

## Lighting Systems that Perform

Our team creates high-performance LED systems that reduce energy costs, enhance safety and light quality, and optimise operations in industrial, commercial, and public settings.

## Diagnostics that Safeguard

To optimise asset performance, we offer turnkey lighting solutions enhanced by certified thermography scanning. This proactive service identifies hidden issues, validates installations, and safeguards critical infrastructure.

## Partnership that Delivers

Partnering with us for your LED needs, new builds, retrofits, smart controls, maintenance, and performance monitoring, ensures better lighting, cost savings, and confident operation.

# VISION & MISSION

To deliver turnkey LED lighting solutions that make it effortless for clients to illuminate smarter and save more. From audit and design to installation and support, we engineer high-performance systems tailored to each site. With integrated thermography diagnostics, we validate quality, detect faults early, and protect critical assets, ensuring safety, efficiency, and long-term value.

● LIGHT SMARTER

● SAVE BIGGER

● OPERATE SAFER

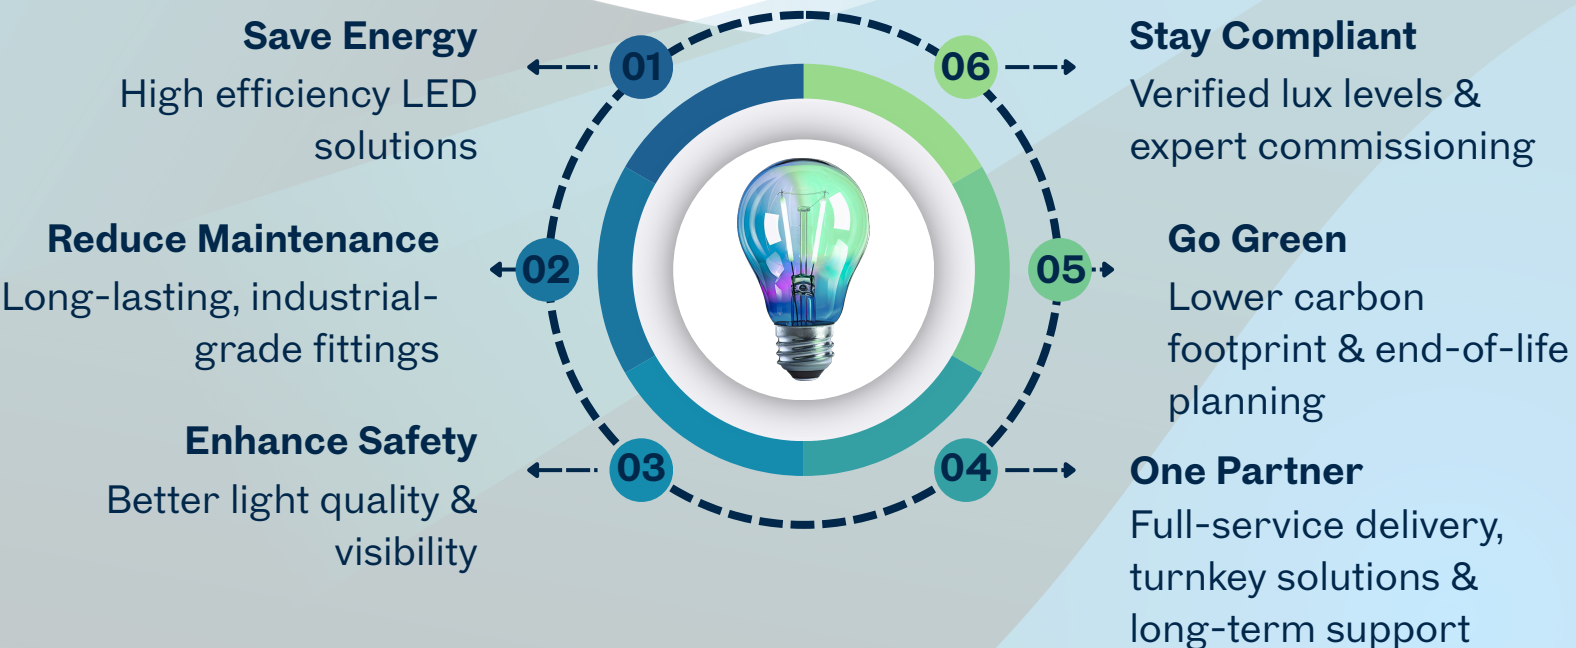

# LED LIGHT SPECIALISTS

## WHAT WE OFFER

- Turnkey LED Projects – Audit, design, supply, install, commission,
- Lighting Solutions – Retrofit & new-build for industrial, office, retail, street, and hazardous areas
- Compliance & Documentation – Lux verification, as-built drawings, manuals, and warranties
- Lifecycle Support – Maintenance, spares, performance monitoring, and warranty management
- ROI & Funding – Energy baselines, savings models, and payback calculations

## WHY CHOOSE US

● LIGHT SMARTER

● SAVE BIGGER

● OPERATE SAFER

# INFRARED THERMOGRAPHY

## WHAT WE OFFER

### Electrical Assets

Switchboards, MCCs, transformers, UPS, PV boxes

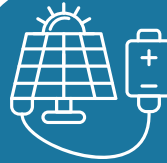

### Mechanical Systems

Motors, bearings, conveyors

### Building Envelope

Insulation gaps, moisture, roof leaks, HVAC

### Solar & Battery

Hotspots, string imbalance, connector faults

### Quality Assurance

Post-install verification for LED & electrical

### Reporting

Actionable insights

## WHY CHOOSE US

### Detect Faults Early

Prevent downtime & damage

### Improve Safety

Spot overheating before failure

### Verify Quality

Support warranties & new installs

### Optimise Maintenance

Prioritise repairs & reduce call-outs

### Boost Efficiency

Identify thermal losses

### Support Compliance

Clear reports for audits & insurance
